

OUR STORY

About the Kilimani Children's Clinic

Kilimani Children's Clinic opened its doors to the public in November 2018.

Since then, we have grown thanks to our dedicated team. We are committed to providing personalized high-quality care for your child right from birth all the way to young adulthood. Our paediatricians are first and foremost experienced parents themselves and have an unwavering passion for the health of your child. Each brings in a wealth of experience in clinical practice. Together, working as a team, we guarantee exceptional clinical acumen and highest level of care. Backed by diagnostic and supportive services in radiology laboratory, pharmacy, occupational therapy, speech therapy and dental services, ours is a one stop shop for all your child's health needs.

We have made special effort to provide consistency in care in a spacious warm and nurturing environment for you and your family where your children will look forward to a repeat visit with doctors and nurses that they are familiar with. We take pride in forging and nurturing relationships with our clients and their families, as ours is a deliberate effort and promise to see you and your family through this journey of curative and preventative health care. Be assured, your health is our top priority.

VISION AND MISSION

OUR VISION

To be the leading paediatric clinic in the region providing holistic quality outpatient services.

OUR MISSION

To provide the best quality pediatric outpatient care in a friendly and safe environment.

OUR VALUES

"little adults", and we recognize the stress and anguish associated with having a sick child and how this impacts the entire family. We at Kilimani Children's Clinic are dedicated to a family-centred approach to care. We recognize the unique emotional, spiritual and social needs of each family, and we tend to each family as such. Besides the clinical care, we are dedicated to giving you an experience like no other as you journey through our care points.

SAFETY; We advocate for patient safety each and every day. By involving everyone at Kilimani Children's Clinic, we deliver safe patient care with measurable results. Through routine RCA sessions, we are always trying to better ourselves so that we may provide the best possible care for our patients and their families.

HEALTH EDUCATION AND DISEASE PREVENTION: We recognize that each child is unique and has unique needs. We therefore monitor and follow them individually and are keen at identifying risk factors and take time to advise each parent accordingly.

QUALITY: In all our operations, we aim at providing the best quality service and pursue to remain updated in our field and to maintain internationally acceptable standards of care.

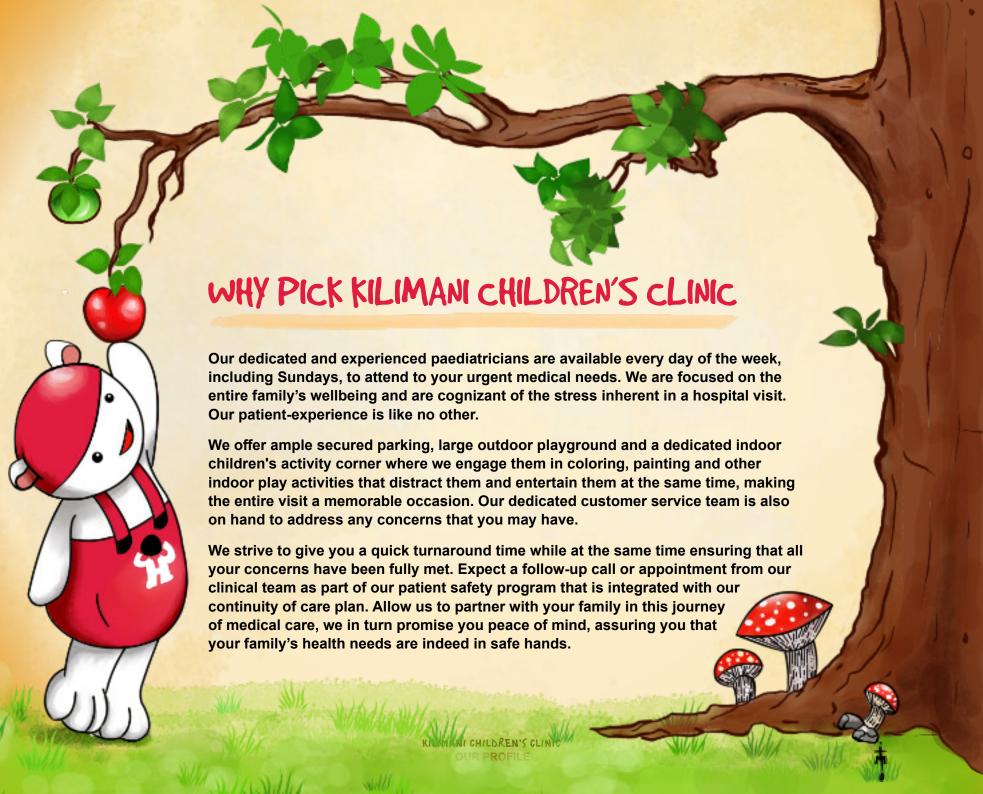

TEAMWORK: We relate with the mantra "If you want to go fast, go alone, if you want to go far, go together". We have cultivated a culture of shared responsibility throughout the organization as we understand the enormous value this adds to our performance. This is also seen in our "communal" care of all our patients as practiced by our team of consultant paediatricians. We collaborate and consult with each other on various cases ensuring that our clients get only the very best of care.

GROWTH: We support and inspire our staff members to advance in their careers through various inhouse programs that also see them take on more responsibility as they transition upwards within our organization.
